

FAJAR HADI SAPUTRA

Senior Full-Stack & Mobile Engineer | Building AI-Powered Web & Mobile Products | React, Next.js, React Native, Flutter | Node.js & Python | LLMs, RAG & Voice AI

kingpig0117@gmail.com · Indonesia · github.com/mvpcraft

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 7+ years building and shipping AI-powered web and mobile applications for startups and product teams. Strong across the full stack, including React, Next.js, and TypeScript on the web; React Native, Flutter, Swift, and Kotlin on mobile; and Node.js and Python (Django, FastAPI) on the back end. Skilled at integrating LLMs, RAG pipelines, and OpenAI APIs into production, and at using AI tools (Cursor, GitHub Copilot, Claude Code) to ship faster. Proven record of scaling products to 100,000+ users, improving performance by 40%+, and leading teams in Agile environments.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, Dart, Swift, Kotlin, SQL

AI / ML: LLM integration (OpenAI, Anthropic), RAG, LangChain, vector DBs, prompt engineering, voice agents (LiveKit, ElevenLabs, TTS/STT), AI-assisted dev (Cursor, Copilot, Claude Code)

Web / Frontend: React, Next.js, Redux, Context API, Tailwind CSS, HTML5/CSS3, Vite, Webpack, code splitting, lazy loading

Mobile: React Native, Expo, Flutter, Swift / SwiftUI (iOS), Kotlin (Android), push notifications, App Store & Play Store publishing

Backend: Node.js, Express.js, Python (Django, FastAPI), REST API design, GraphQL, WebSockets, JWT / OAuth2

Databases: PostgreSQL, MySQL, MongoDB, Firebase / Firestore, Redis, schema design & query optimisation

DevOps / Cloud: AWS (EC2, S3, Lambda), Docker, CI/CD (GitHub Actions), Nginx, Linux server administration

Practices / Tools: Startup 0 to 1 product delivery, Agile / Scrum, Git / GitHub, Jira, Figma, Postman, accessibility (WCAG)

PROFESSIONAL EXPERIENCE

Co-Founder & Senior Mobile Engineer | [PlayByPlay Anime](#)

June 2025 - April 2026 · 11 mos

- Co-founded an AI-powered sports prediction app with real-time, anime-style voice commentary, taking it from concept to App Store and Play Store launch.
- Built a real-time AI voice agent using LiveKit for low-latency audio streaming, with ElevenLabs text-to-speech (TTS) and speech-to-text (STT) for natural, conversational interaction.
- Led mobile engineering in React Native and Expo, shipping cross-platform iOS and Android builds and managing App Store Connect releases.
- Designed and deployed a Node.js backend on AWS (EC2) powering live predictions and LLM-generated commentary, with on-device QA via AWS Device Farm.

Senior Web & Mobile Developer | [Business Brokerage Services, LLC](#)

January 2023 - February 2026 · 3 yrs 2 mos

- Led end-to-end design, development, and delivery of scalable web and mobile applications serving 100,000+ active users, using React, Next.js, TypeScript, React Native, and Flutter.
- Architected and shipped AI-powered features (LLM integrations and RAG-based search and assistant workflows using OpenAI and vector databases) from prototype to production under tight deadlines.
- Boosted application performance by 40%+ and reduced load times by 35% through code splitting, lazy loading, caching, and asset optimisation.
- Accelerated delivery using AI-assisted development tooling (Cursor, GitHub Copilot, Claude Code), shipping 15+ high-impact features on schedule.

- Mentored 3 to 5 junior engineers (+25% team productivity) and refactored legacy codebases, cutting production bug rates by 30%.

Full-Stack Engineer | [Dazzle Lab](#)

January 2021 - December 2022 · 2 yrs

- Built and shipped full-cycle web and mobile applications in a fast-paced startup, owning features from concept to production for 1,000+ active users.
- Designed and optimised RESTful APIs with Node.js, Express, and Python (Django), reducing average API response time by 40%.
- Engineered scalable database schemas (PostgreSQL, MongoDB) and delivered 10+ features with third-party and AI API integrations, improving query efficiency by 30%.

Frontend Developer | [UpdatedAI](#)

July 2019 - December 2020 · 1 yr 6 mos

- Developed and deployed 5+ production-grade React applications with a scalable, reusable, TypeScript-based component architecture.
- Improved page-load performance by 30-40% through lazy loading, code splitting, and bundle analysis.
- Integrated 20+ third-party APIs and standardised a reusable component library, cutting UI inconsistencies by 35% and lifting engagement by 25%.

Junior Web Developer | [AskHandle](#)

November 2018 - June 2019 · 8 mos

- Built 10+ responsive, accessible web pages (+25% mobile usability) and contributed to a shared React component library that cut development time by 15%.
- Integrated REST APIs (+20% data-loading speed), resolved UI/UX defects, and delivered 90%+ of tasks on time in an Agile / Scrum workflow.

EDUCATION

Bachelor's Degree in Computer Science

Institute of Social and Political Science, Jakarta · 2017 - 2019
